

The COVID-19 outbreak has escalated the need for innovative solutions to continue to provide high quality CV care, while telehealth and virtual care delivery have emerged as invaluable tools for ensuring continuity of care. MedAxiom has compiled a list of telehealth/virtual solutions, screening tools and other resources from our industry partners and acquaintances to help arm CV organizations with tools for success in the face of COVID-19.

**If you reach out to one of these organizations, please let them know that you're a MedAxiom member.**

[SEE HUMAN/STAFFING SUPPORT BELOW](#)

Geneva Health Solutions has developed a Covid-19 [Rapid Response Solution](#). BioTel Heart has [expanded MCOT™ service](#) to monitor life-threatening QT prolongation in covid-19 patients, and [issued a report](#) on continuous telemetry for covid-19 patients treated with hydroxychloroquine and azithromycin.

For more information, contact Deb Halligan, VP of Clinical Operations at [deb.halligan@gobio.com](mailto:deb.halligan@gobio.com).

Moving Analytics offers a [virtual cardiac rehab solution](#) that lets you communicate with patients, monitor vitals and assign home based exercises and education.

For more information, contact Ade Adesanya at (832) 851-4133 or [ade@movinganalytics.com](mailto:ade@movinganalytics.com).

CARDIAC DEVICE MANAGEMENT SOFTWARE

[Murj](#) supports device clinic operations and facilitates a remote care ecosystem using the latest in online technology, including video conferencing and real-time chat.

For more information, contact (831) 621-2349 or [info@murj.com](mailto:info@murj.com).

pMD is experiencing [record adoption](#) of their solution which offers secure messaging and video chat, and has developed a [COVID-19 case management and telehealth toolkit](#).

For more information, contact (800) 587-2898 or [sales@pmd.com](mailto:sales@pmd.com).

[Preventice](#) is a tech-enabled, service-based approach that can support clinicians in diagnosing patients threatened by cardiac arrhythmias, including a comprehensive suite of remote cardiac monitoring technology.

For more information, contact Todd Rozas at (512) 773-8677 or [trozas@preventice.com](mailto:trozas@preventice.com).

RxVantage offers a [no-cost online platform to maximize efficiency in life science rep management](#) and automates new protocol guidance communications, including covid-19. RxVantage recently launched a [Virtual Meetings feature](#) to run remote meetings with life science experts.

For more information, contact 866.464.2157 or [support@rxvantage.com](mailto:support@rxvantage.com).

Sharecare launches HIPAA-Compliant platform, [Sharecare Telehealth powered by Updox](#), to enable providers in U.S. with telehealth. This solution instantly enables providers, practices and health systems of all sizes to care for their patients remotely and is free through September 1, 2020.

For more information about Sharecare Telehealth, visit [www.sharecare.com/telehealth](http://www.sharecare.com/telehealth).

**Virtual care will sometimes require human/staffing support, for which three partners offer solutions:**

With MDabstract's [remote manual abstraction and discrete data services](#), telehealth patients can be properly "prepped" so clinicians have the EHR data they need at their fingertips for each visit. As a flexible human solution, MDabstract is available to [assist in areas where clinical documentation and staffing gaps have developed](#) as a result of the move to virtual visits.

For more information, contact Kristi Payne at (904) 226-2384 or Amanda Skinner at (904) 338-6942.

Moonlighting Solutions provides [staffing support for telehealth programs](#) (and traditional programs).

For more information, contact Mike Guenther at (908) 783-0678 or [mike.guenther@moonlightingsolutions.com](mailto:mike.guenther@moonlightingsolutions.com).

[ScImage's](#) PICOM365 Cloud solution supports telemedicine and provides a full suite of diagnostic image management and reporting tools to support remote physicians, and has a world-recognized support team, stationed in the US, providing uninterrupted remote support.

For more information, contact [corporate\\_sales@scimage.com](mailto:corporate_sales@scimage.com) or visit [scimage.com](http://scimage.com).
