

Human Intelligence Enhanced by Artificial Intelligence

CardioCare

Digital Health Platform

A REVOLUTION IN CARDIOVASCULAR IDENTIFICATION AND MANAGEMENT

What began as a bold idea is now a single-source solution that helps healthcare systems elevate cardiovascular (CV) patient care.

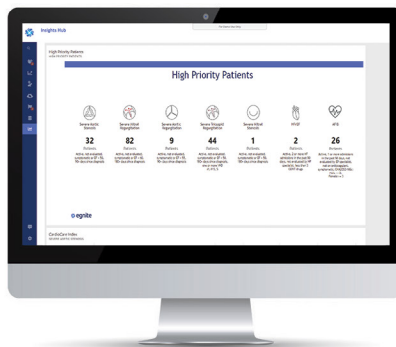

The CardioCare platform applies the power of egnite's big data to a hospital's entire patient population and uses proprietary artificial intelligence algorithms to identify at-risk patients and help physicians prioritize care and guideline-directed therapy.

The CardioCare platform software delivers:

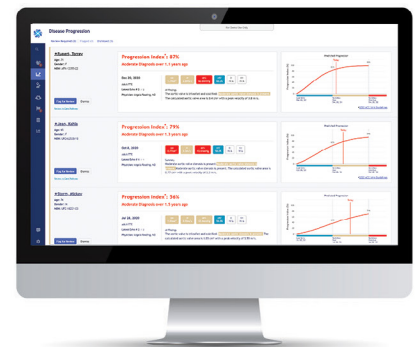

POPULATION HEALTH MANAGEMENT

Automatically identify and manage your hospital system's entire SHD, HFREF, and AF patient population to ensure they receive timely, guideline-directed therapy

INSIGHTS ON DEMAND

Prioritize care for patients eligible for life-saving therapy

PREDICTIVE ALGORITHMS¹

Identify patients with a higher likelihood of having under-diagnosed severe disease

The CardioCare platform helps physicians improve quality of care:

Average SHD Procedural Growth²

↑ **25%**

Improvement in HFREF GDMT³

up to...
↑ **21%**

¹ Moualla SK, et al. Intelligence-Based Medicine. 2022;6:100062; Thomas JD, et al. Intelligence-Based Medicine. 2022;6:100059.

² Analysis represents average growth from 17 CardioCare sites with baseline data one year after implementing the CardioCare platform.

³ Data representative of 1 HF center of excellence teaching institution from 1/1/2020 - 11/30/2022.

structural heart disease (SHD), heart failure with reduced ejection fraction (HFREF), atrial fibrillation (AF)

The CardioCare platform provides a comprehensive view of your cardiovascular patient population, identifying at-risk patients to help close gaps in patient care.

1 Software Capabilities

The CardioCare platform unlocks access to population health management across the cardiovascular service line:

AORTIC STENOSIS

MITRAL REGURGITATION

AORTIC REGURGITATION

TRICUSPID REGURGITATION

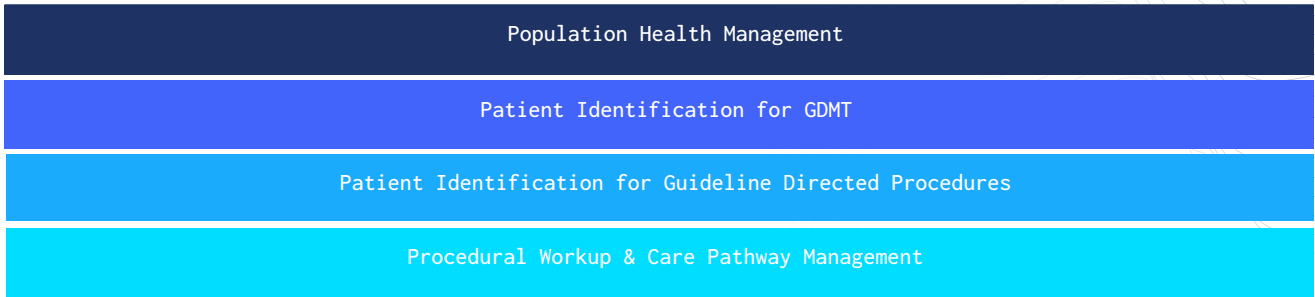

MITRAL STENOSIS

HF rEF

ATRIAL FIBRILLATION

2 Powerful Insights

Delivers on-demand insights of your hospital system's entire cardiovascular patient population to reduce variability and ensure patients receive timely therapy:

On-Demand Access to Hundreds of Insights

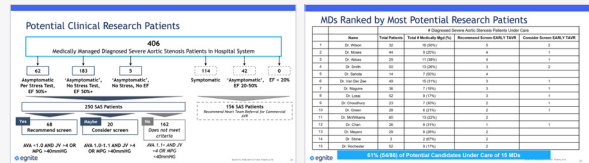

Custom Analytics* (30 hours per year)

Examples Include:

- Peer Benchmarking
- Variability in guideline-directed care
- Improve high-risk patient management

Examples Include:

- Publication initiatives driven by your Research Department
- Customized research into your patient population

Talk to your egnite representative about how to elevate the standard of care for your cardiovascular patients with the CardioCare platform.
