

# PatientCare

## NEW REVOLUTION IN ARRHYTHMIA MONITORING

## COMPLETE SERVICE OFFERING SCALED TO YOUR NEEDS

- You purchase PatientCare platform. A flat software subscription fee is charged per device monthly.
- You become responsible for the ownership, refurbishment and billing.

### LEVERAGING OUR OPTIONAL SERVICES AND CAPABILITIES

- Our team can serve as a support system eliminating the old barrier of round-the-clock staffing. Fees are charged per patient basis.

### LICENSED AND CERTIFIED IDTF PARTNER

- Building daily telemetry reports
- Notifying of critical events
- Handling events during business hours, after hours or holidays

### 24X7 CUSTOMER SUPPORT

- Educating patients
- Troubleshooting for all service types

## WHY WAIT? PATIENTCARE ENABLED CLINIC OF TOMORROW

### SIMPLICITY

- One device and one software license for all modalities

### TRANSPARENCY

- Complete beat-to-beat data access

### ACCURACY

- Driven by machine learning, you can build and edit highly accurate reports

### FLEXIBILITY

- Configurable workflow

Caution: U.S. Federal law restricts this device to sale by or on the order of a physician.

HIPAA: Health Insurance Portability and Accountability Act | IDTF: Independent Diagnostic Testing Facility

## BODYGUARDIAN® MINI FROM PREVENTICE

**Intended Use:** The sensor is intended for adult and pediatric patients who require vital sign monitoring be it inside or outside hospital, or healthcare facility environment. The sensor does not provide interpretive statements. Final interpretation and diagnosis is the responsibility of a physician. **Safety Precautions:** Do not disassemble, try to repair, or modify sensor. Sensor does not have any electrical stimulation capabilities. The sensor does not directly provide diagnosis as a supervising physician is responsible for ECG data interpretation. **Contraindications:** The sensor is contraindicated for those patients requiring attended, in-hospital monitoring for life threatening arrhythmias **Warnings:** Do not attempt self-diagnosis or self-treatment based on acquired data. Not suitable for use in MRI environment. The device is not intended to be used at the same time with high frequency (HF) surgical equipment or with a defibrillator. Patients who have active implantable medical device (like heart pacemaker and so on), should consult supervising physician or doctor before use. To avoid danger of electrical shock and electromagnetic disturbances, the computer and associated equipment used with the ECG Sensor should comply with IEC/EN 60950 (IT and office equipment safety) or EN60601-1 (Medical electrical equipment safety) standard. If a computer that does not comply with the IEC/EN 60601-1 requirements is used in the patient environment, the computer and peripherals must be plugged in using an isolation transformer that fulfills the requirement.
