Drive Outcomes, Improve Quality Scores, Enhance Profitability

The Sharecare Diabetes Solution offers end-to-end turnkey diabetes care and glycemic management services for physician practices. Sharecare provides the processes and technology to deliver a fully integrated program that positions organizations as diabetes management leaders in the community. Sharecare's proven solution enables practices to provide financial cost savings, exceed clinical and quality measures, as well as yield positive outcomes for people living with diabetes.

Sharecare identifies gaps in care and delivers the solution for patient treatment.

Proprietary Tools

- **Data Aggregation** – Software integrates with EMR system to streamline process of enrolling patients in revenue—generating programs, ensures maximum reimbursement in ACO, MIPS, or Commercial Payer Environments, and reduces practice abrasion related to achieving quality metrics.
- **Telehealth** – Providers safely and conveniently address patients' healthcare needs remotely in a group or individual setting via HIPAA compliant platform.
- **Sharecare LEAD** – Learning and engagement platform providing a continuum of resources for providers and patients to support education.
- **DiaWEB** – EMR integrated platform for documentation, reporting, and scheduling.

3 Reimbursable Programs: DSMES, IBT for Obesity, MNT

Sharecare ensures physician practices build an ADA/ADCEs accredited diabetes program or enhances current diabetes program with resources, efficiencies, and reporting.

Sharecare provides the lessons, topics, framework, and resources to deliver **Diabetes Self-Management Education and Support (DSMES), Intensive Behavioral Therapy for Obesity (IBT for Obesity), and Medical Nutrition Therapy (MNT)** programs. Patients participate in education programs through your facility, meeting virtually or face-to-face with clinical teams to learn how to develop healthy habits.

Sharecare Diabetes Solution provides resources and programs that will **increase revenue and improve quality scores** while keeping patients educated and **improving health outcomes**.
