

Is Saving \$1 Million Important To Your Program? What If It Was \$1 Million Each Year? What If It Was More?

The path to improving PCI patient experience and reducing costs is clear, and achievable!

\$18,000 is all it will cost your program to find your savings potential.

Price goes up on May 1, 2017

Learn what other programs have already discovered. Creating care pathways structured around a more efficient process provides substantial cost savings.

The Cath Lab Care Pathway Operational Assessment Can Show You the Way

Outcomes:

- Assess the efficiency and efficacy of each step within the cath lab care process
- Leverage the use of transradial access as a tool to reduce costs and improve patient satisfaction
- Offer recommendations to eliminate waste, costs and barriers to patient, staff and provider satisfaction
- Outline a path to improve the number of safe, same-day discharges for your CV population
- Provide a plan to redesign key administrative and clinical processes surrounding all patients and elective/staged Cath Lab procedures; providing a margin of savings on true outpatients to better support fixed inpatient DRG reimbursements

Facilitation:

- 2 MedAxiom Consultants
- Over 2 Days

Components:

- Data Collection
- Remote Analysis
- On Site Interviews, including Key Stakeholders, and Observations
- Synthesis & Analysis
- Summary Report with Key Finding and ROI

Cost Savings of \$750k-\$2.8m in the following areas:

- Resource Optimization
- Cath Lab Scheduling/Resource Allocation, both fixed and human
- Physician Schedules/Office and Hospital
- Roles and Responsibilities
- Reduction in Capital Needs
- Improved Patient Flow
- Hospital Capacity Issues
- Protocol Opportunities
