

IN AN ENVIRONMENT OF UNPRECEDENTED CHANGE, HOW DO YOU ACCURATELY PROJECT WORKFORCE NEEDS?

Provider Workforce Planning

YOUR CHALLENGES:

- Aging Physician Workforce
- Move to Sub-Specialization and Care Teams
- Advance Practice Provider Utilization
- Volume Declining – Resistant to Recruitment
- Population Health
- Need to Grow Market Share

OUR SOLUTION:

Take a new look at your recruitment plan and know how many providers you need (for now and tomorrow) based on objective market data. Long-term system viability in today's health care environment is dependent on a strong understanding of specific provider needs to:

- Achieve strategic and programmatic goals
- Develop differentiable quality programs
- Have the proper access based on the population needs
- Maintain cost effectiveness

Our comprehensive approach to Provider Workforce Planning includes:

- Quantitative population-based metrics customized to your market
- Quantitative procedural and volume-based metrics specific to Cardiology
- Qualitative assessment based on the program size, job assignments, coverage model, call and other program needs (new service offerings, clinical program development)

MedAxiom members enjoy a 25% discount on all MedAxiom Consulting Services.

RESULTS:

We provide your organization with a customized report outlining:

- Current provider supply and demand calculations
- Projected Provider Workforce needs based on the organizational initiatives
- A Provider Workforce Plan based on internal and external factors including APP utilization, clinical sub-specialization and program development
