**Methodology**

- **Web Interface:**
  - Changes
  - High Priority
  - N/A

- **Registry, EHR Process:**
  - Changes
  - High Priority
  - N/A

- **Registry Outcome:**
  - Changes
  - High Priority
  - N/A

- **Core Measure:**
  - Changes
  - Substantive
  - Core Measure 0068
  - Core Measure 0066
  - Core Measure 0070
  - Core Measure 0028

- **Process Efficiency:**
  - Changes
  - High Priority
  - N/A

**Notes**

- Unhealthy Alcohol Use: Screening & Brief Counseling:
  - At least once within the last 24 months AND who received brief counseling if identified as an unhealthy alcohol user.

- Tobacco Use and Help with Quitting Among Adolescents:
  - At least once within the last 24 months AND who received cessation counseling intervention if identified as a tobacco user.

- Cardiac Rehabilitation Patients Referred for Continuation of Care (CRPC):
  - At least once and within the previous 12 months have experienced an acute MI, or stroke; or have had an acute myocardial infarction (AMI), coronary artery bypass graft (CABG), or percutaneous coronary intervention (PCI) within the previous 12 months.

- Ischemic Vascular Disease All or None Outcome Measure:
  - 75% of patients 65 years of age and older who were ordered high-intensity statin therapy during the measurement period: Adults aged ≥ 21 years with the indication of cardiovascular events—who were prescribed or were on statin therapy during the measurement period.
